

What are the Benefits of Upgrading my ScanVision sEMG?

Last Modified on 07/19/2018 9:17 am PDT

The new 3-piece rechargeable ScanVision devices are here, with some new benefits to make your job easier.

	<u>Upgraded 3-Piece ScanVisions</u>	<u>Battery Powered and 2-Piece ScanVisions</u>
<u>High Readings</u>	<p>Order a self-service replacement front-end. Change out your front-end piece in minutes so you can get back to scanning.</p> 	<p>On the old style of scanner you needed to send your devices in to have the front-ends replaced.</p> 
<u>Number of scans on a standard battery life</u>	<p>Never buy batteries for your scanners again. Plus, get around <u>200</u> scans for each charge.</p> 	<p>Standard batteries are able to perform around 60 scans before the batteries run out of power.</p> 

If your cell phone charger puts out at least 2.1A you can charge them with your cell phone charger.

Is your battery dead? A quick 5 minute charge will get you through the next few

patients.

Don't let batteries control your scan schedule. Be prepared to scan anywhere without worrying about the hassle of replacing batteries.
